## Real GDP Growth (%)

## Monetary Policy Rate

## PDL 30+

## Consumer Price Index (%)

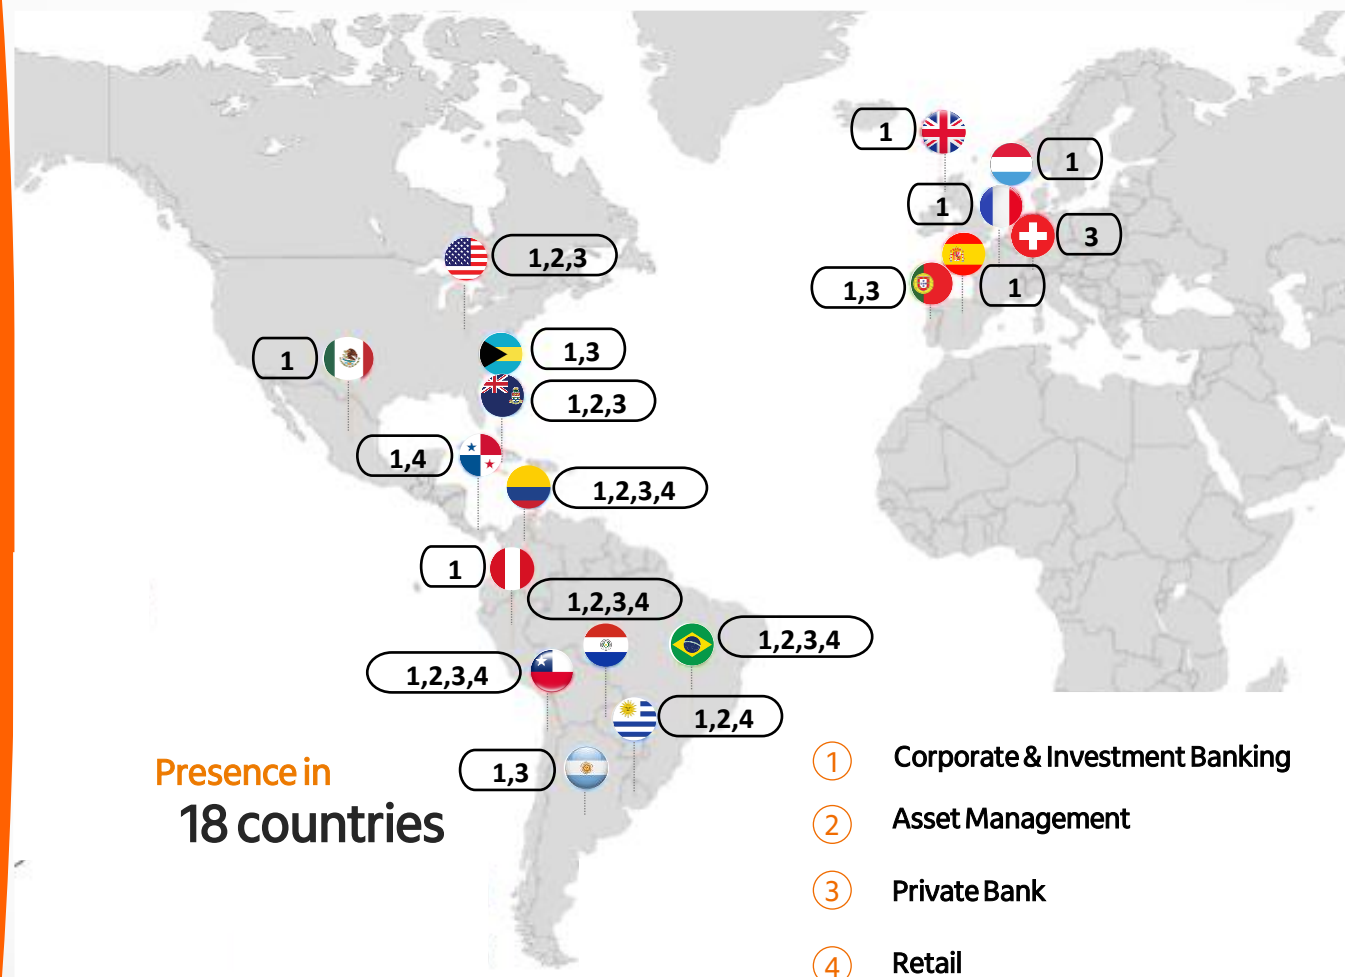

We revise down slightly our GDP growth expectations for 2025 to 2.0% and for 2026 to 2.3%.

This adjustment reflects changes in our global outlook, including lower oil prices, weaker growth in the US (Colombia's main trading partner) and more restrictive domestic monetary policy.

In a context of elevated global and political uncertainty, and persistent inflation above target, the Central Bank's Board is likely to remain cautious in the short term.
